FOR IMMEDIATE RELEASE

Glen Ellyn, IL, Nov. 2, 2020 – The [United States Golf Challenge \(USGC\)](#) and [Prefense](#) have forged an agreement for Prefense to supply their revolutionary, alcohol-free, hand and skin sanitizer to participants in USGC National Qualifiers and USGC National Championship.

In this era of pandemic, the USGC was looking for a partner that would help ensure the safety of USGC players at USGC events”, says Patrick Polzin, a USGC National Director. When compared to other hand sanitizers, Prefense easily out-performs the competition. Prefense is made from a water-based formula that helps retain your skin’s natural moisture instead of drying it out. Additionally, the no-mess Prefense foam is safe for the whole family.

About Prefense – In 2008, Prefense LLC began producing a revolutionary, alcohol-free, hand and skin sanitizer that retains your body’s natural moisture with a patented formula. Prefense is proudly made and bottled in the United States and is sold in countries around the world. It is different from most hand sanitizer products because it is alcohol-free while still killing 99.99% of germs. This ensures it will not dry the skin and cause redness, chapping, and flaking.

About the USGC - The United States Golf Challenge (USGC™), owned and operated by Medalist Events LLC, is entering its 7th season as America’s representative to the **International King’s Cup** and will conduct over 20 National Qualifying events around the country with qualifying teams playing in the USGC National Championship in October, 2021 culminating in the selection of Team USA for the 2022 International King’s Cup.

The International King’s Cup is a team match play event played in honor of golf’s greatest ambassador – **Mr. Arnold Palmer**, whose Honesty, Integrity, Sportsmanship and Commitment to Excellence represent the ideals for which the game of golf is known.
